1. Claims 1-27 are allowed.

2. The following is an examiner's statement of reasons for allowance: Applicant's arguments presented in the Appeal Brief filed 2/22/07 are deemed persuasive.

Specifically, the prior art of record fails to teach or fairly suggest to one of ordinary skill in the art at the time of the invention, in conjunction with ALL the other limitations of the independent claims, "a locked state to an armed state responsive to a key" as in independent claim 1; "(a) urging a deposit holding container to slide adjacent a bracket of an automated banking machine, ... wherein the container includes a locking mechanism ... in an armed state, ... (b) urging with a first portion of the automated banking machine the locking mechanism to change to a locked state responsive to (a);" as in independent claim 16; the chest with the generally L-shaped outer contour including an upper face with an opening therethrough, an acceptor device positioned above the shorter portion an operative to move items through the opening as in independent claim 24; or the locking mechanism to change from the first state to a second state, wherein with the locking mechanism in the second state the door will be held closed by the locking mechanism when the door is next moved to the closed position and subsequently urging the container to slide out of the chest and then urging through engagement with a portion of the automated banking machine, the door of the deposit holding container to move from the open position to the closed position, wherein when the door has moved to the closed position, the locking mechanism in the second

state prevents the door from thereafter moving from the closed position to the open position as in independent claim 25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
